

1. How will you assign a div with the class 'test' in a variable called 'demo'?

```
let demo = document.querySelector(".test");
```

2. How will you assign a div with the id='denne' to a variable called 'unik'?

```
let unik = document.getElementById("denne");
```

3. How will you find the link in the NTNU logo top left at this page (<https://www.ntnu.no>)? (NB. The link, not the actual picture).

```
document.getElementById('home_href').href
```

4. What should you write in the "Console" to make the input field for the search bar top right at this page (<https://www.ntnu.no>) say "studier"?

```
document.getElementById('ntnu-search').placeholder = "studier";
```

5. What do you need to write in the "console" to simulate a click event at the "Student i Gjøvik" button in the "Studentliv" menu? <https://www.ntnu.no>

```
document.getElementById("yui_patched_v3_18_1_1_1614693838454_151").click()
```
